Web Developer

EXPERIENCE

BePro DevHub

April 2025 - Present, Tashkent Uzbekistan

Web Developer

- Worked on the frontend of UDS, a nationwide emergency dispatching system that unifies 101, 102, 103, and 104 services through a centralized platform accessible via 112.
- The system helps emergency-service operators and field employees manage calls and operations digitally, reducing paperwork and improving transparency of activities and expenses

PROJECTS

Namoz Vaqtlari API

- A free REST API providing accurate daily prayer times for 12 regions of Uzbekistan and the Republic of Karakalpakstan.
- Developed a web interface using Angular and a backend API using ASP.NET Core, with structured data endpoints for retrieving prayer times by region and date.

Namozxon Bot

- A Telegram bot reminding you of 5 daily prayer times, covering 12 regions and Karakalpakstan. By reminding pray times it also tells interesting quotes. I built its backend using ASP.NET Core. Now it's users above than 200

Tarvooz

- An online marketplace featuring a wide range of products and a user-friendly shopping experience.
- Developed as a team project for the Sharpist Battle at Najot Ta'lim, where the project competed against other teams and won 1st place. The project focused on creating a modern marketplace interface, implementing product browsing and shopping functionality, and delivering a complete end-to-end user experience.
