EDUCATION

Vellore Institute of Technology, Chennai

July 2024 – May 2028 (Expected)

- B.Tech in Computer Science and Engineering (Data Science)
 - CGPA: 7.99/10
-

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, JavaScript, C

Frameworks and Libraries: React, FastAPI, Django, Node.js, Express.js, Framer Motion, Tailwind CSS

Databases: PostgreSQL, MySQL, Oracle Database, MongoDB

AI & Machine Learning: PyTorch, Scikit-learn, Ollama, Hugging Face, MediaPipe, Pandas, NumPy, Matplotlib

Developer Tools: Git, GitHub, Docker, Linux, Power BI, Postman, VS Code

EXPERIENCE

AIML Intern – BlackVolt Technologies Pvt. Ltd.

June 2026 - Present

- Currently working as an AI/ML Intern, gaining industry exposure to Artificial Intelligence and Machine Learning.
- Enhancing my technical skills through practical learning, collaboration, and real-world development experience.

Unified Project Management System (Co-inventor) – Published Indian Patent

June 2025 - Present

- Engineered a unified project management platform designed to streamline team formation, guide allocation, project submissions, and evaluation workflows through a centralized system.
- Designed a randomized panel-assignment algorithm preventing duplicate guide/panel allocation, ensuring fair, conflict-free evaluations.

CodeChef VIT – Chennai Chapter

July 2026 - Present

- Member of the CodeChef Chapter - VIT Chennai (Event Management), participating in technical and community-driven initiatives.
 - Engaging in coding activities, collaborative events, and continuous learning to strengthen problem-solving skills.
-

PROJECTS

Concurrent Web Crawler

[Link](#)

[GitHub](#)

React • FastAPI • Python • asyncio • aiohttp • BeautifulSoup • SQLite • Docker • GitHub Actions

- Engineered a concurrent web crawler for SEO auditing and performance analysis.
- Implemented asynchronous crawling using Python's asyncio to analyze up to 200 webpages per audit.
- Automated an audit pipeline for SEO metrics, broken-link detection, and CSV report generation.

Hybrid Multimodal Insurance Claim Verification System

[GitHub](#)

Python • Pandas • NumPy • Pydantic • Pillow • PyTorch • Hugging Face • Ollama

- Developed a modular insurance claim verification system using conversational inputs and image evidence.
- Implemented multilingual claim extraction, evidence validation, and explainable AI decision pipelines with interchangeable backends.
- Designed an automated framework for AI backend benchmarking and standardized claim evaluation.

GitHub Developer Portfolio Analytics System

[GitHub](#)

React • Node.js • Express.js • MySQL • Ollama

- Built a full-stack GitHub portfolio analytics platform using React, Express.js, and MySQL.
- Designed a normalized MySQL database with REST APIs and CRUD operations for data management.
- Integrated an AI-powered natural language interface using Ollama for intelligent portfolio querying.

Business Intelligence and Power BI Analytics Dashboard Suite

[GitHub](#)

Power BI • Power Query • Python • DAX • Excel

- Developed interactive Power BI dashboards for retail sales, customer churn, and marketing analytics.
 - Performed data cleaning, transformation, and KPI development to generate actionable business insights.
 - Built dynamic visualizations and reports to support data-driven decision-making across multiple business domains.
-

CERTIFICATIONS AND ACHIEVEMENTS

- Earned HackerRank Skill Certifications in Problem Solving, SQL, Python, Java, JavaScript, Node.js, CSS, C#, and R.
- Participated in Smart India Hackathon 2025, HackerRank Orchestrate June'26 and multiple college-level hackathons, building AI and software engineering solutions.
- Completed certifications in Introduction to Prompt Engineering for Generative AI (LinkedIn Learning), Modern Web Development with MERN Stack (Face Prep), and Data Science & Analytics (Future Interns).
