

# DANIEL AMIEVA RODRIGUEZ

**Current Role:** Senior Data Engineer @ TeamStation AI  
**Techs:** R, Python, SQL, AWS, Azure, GCP, DevOps, DataOps

linkedin.jobs.frequent526@passmail.net  
Mexico City, Mexico

## Summary

6+ years of experience architecting and optimizing data solutions on Google Cloud Platform (GCP) and multi-cloud environments. Specialized in ETL/ELT pipelines, advanced SQL performance tuning, and BI automation using Python and modern analytics tools. Experienced in machine learning integration, enterprise data strategy, and delivering scalable end-to-end data platforms. Strong ability to translate complex technical concepts for both technical and business audiences

## Relevant Experience

### Senior Data Engineer - TeamStation AI

2025 - current

- \* Built ground-up medallion data lake with SAM IaC (AWS Glue, Step Functions, Lambda, DMS streaming) replaced Spark with DuckDB + Lambda, cutting compute costs 40% and processing time 60%
- \* Developed REST API endpoints using FastAPI and contributed to the Django backend application, owning end-to-end feature delivery from API design and data integration through deployment to ship application functionality to production
- \* Built AI-enhanced Quarto documentation system covering Step Functions, Lambdas, and custom Python packages accelerated team onboarding across complex serverless architecture

### Senior Business Developer Engineer - Rackspace

2024 - 2025

- \* Developed and deployed LLM-based applications for HR and BI use cases using OpenAI, Gemini, and agentic AI frameworks, enabling intelligent automation across departments
- \* Developed and implemented CI/CD pipelines using GitHub Actions to streamline deployments for Tableau, Power BI, BigQuery, and ETL orchestrators
- \* Led the optimization of BigQuery SQL jobs and the decommissioning of obsolete assets through data governance initiatives, leveraging CI/CD pipelines to reduce deployment time, with estimated annual cost savings of USD 500,000

### Business Developer Engineer - Baz Super App

2023 - 2024

- \* Partnered with enterprise architects to align data strategies with organizational goals, utilizing multi-cloud environments and ensuring secure data access
- \* Led the implementation of best practices for connecting to APIs to ingest custom data into the data warehouse, ensuring efficient and secure data integration
- \* Designed scalable data architectures on Cloudera, supporting multi-cloud integrations for BI and ML workflows

## Education

**CI CD for Machine Learning (GitOps)** - Weights and Biases

2024 - 2024

---

\* streamline ML workflows and save valuable time by automating ML pipelines and deploying models with confidence

**Applying Machine Learning and AI Services on AWS** - Cloud Academy (QA)

2023 - 2023

---

\* Application use cases for Sagemaker and Bedrock for ML and AI

**LLM Engineering with Structured Outputs** - Weights and Biases

2025 - 2025

---

\* structured output handling, complex validation implementation, and efficient function integration in ML models

**Azure AI Fundamentals** - Microsoft

2024 - 2024

---

\* Demonstrate fundamental AI concepts related to the development of software and services of Microsoft Azure to create AI solutions.

**Engineer Data in Google Cloud** - Google

2023 - 2023

---

\* Cloud adoption acceleration program through google skills boost
